BOEING BUSINESS JET

## A6 RJV

This aircraft is one of the newest in our fleet, having joined us fresh from the factory in 2017, and offers a forward stateroom with ensuite VIP lavatory, forward and aft galleys, a mid-cabin club / conference area, aft business class, and standard class seating.

The contemporary design of this aircraft features carbon fiber and premium materials throughout the cabin, along with a unique cool mood lighting system with over a million color variations, which is controlled by the customer operated iPad-based cabin management system.

This aircraft also boasts a state-of-the-art video-on-demand IFE System, enhanced by our high-quality sound system with overhead speakers and subwoofers, which can be controlled by the RoyalJet provided iPads or via the customer's own device. To maximize the value of this system for our guests, the aircraft has also been equipped with the highest speed communications system (Ka-Band WiFi) available globally. This system allows passengers to stream high definition video content throughout the flight, including via their own personal account with providers such as Apple TV, Netflix, and Amazon Prime Video.

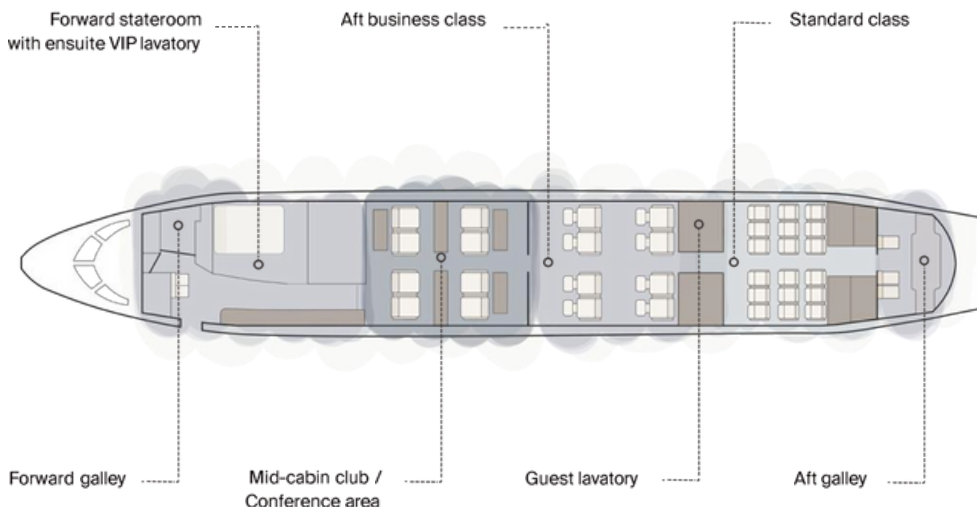

A low cabin altitude modification and HEPA filtration are also featured, which optimize health and comfort, leaving passengers more relaxed and fresher upon reaching their destination.

The cabin configuration offers 34 seats via the mid cabin club eight arrangement, the eight mid/aft business class seats and the 18 aft standard class seats. For overnight or at any time of the flight, this aircraft features a queen-sized bed and 16 lie-flat seats.

## DAY CONFIGURATION

---

## FLEET TYPE

---
